Subject: Postponement

Hi Minal --

Thank you for handling our VMU application before the Planning Commission yesterday.

I would like request that our neighborhood's VMU application before the City Council be rescheduled for after the holidays.

My main reason is that I will be on an airplane Thursday, December 18th, when the City Council is scheduled to hear Heritage's VMU application. I would especially like to be able to attend a later City Council meeting so I can discuss our neighborhood's involvement and concerns with Neighborhood Side Design Standards, which were the topic of much discussion at last night's PC hearing. As you may recall, I was the neighborhood's point person for answering those questions. I had also taken the lead in participating in the SubChapter E one-year review process in order to try to get NSDS written into code, which was also a topic of discussion.

A second reason is that it would also be more efficient for everyone if we were able to present our case to the City Council in its entirety. This would mean having a final decision on the 711 W. 38th tract, which the Planning Commission postponed voting on until January 13th. We are asking that you postpone this case to January 22, 2009 City Council hearing.

Thank-you,
Jolene Kiolbassa
